### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

.The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 10, 16, and 22 recite "a player to control the motor and/or interact with the vehicle". It is not clear what structural limitations the applicant is intending to claim. Is the player to control the motor and interact with the vehicle, is the player controlling the motor only, or is the player interacting with the vehicle only?

Claim 2 recites the limitation "random elements". It is not clear what the applicant intends to claim through this recitation. Claim 24 recites similar language.

## Claim Rejections - 35 USC § 102

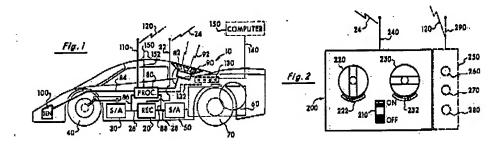

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or

Art Unit: 3712

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

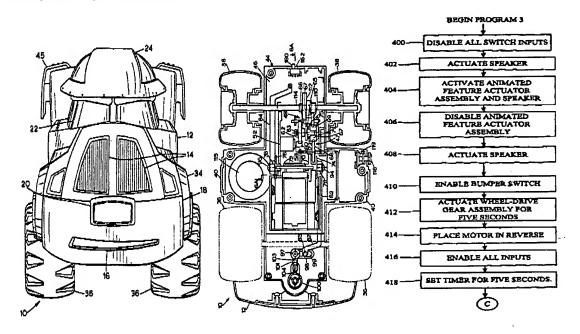

Claims 1-6, 9, 10, 11, 13, 14, 15, and 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Collier.

Collier discloses a toy vehicle (10) comprising a vehicle chassis or frame (see Figure 1) having a plurality of wheels (40,70); a motor (30) driving at least one wheel (70) of the vehicle (10); input control means (220,230) to enable a player to control the motor (30) and/or interact with the vehicle (10), and additional means (100) to control the operation of the motor (30) independent of the input control means (220,230); a microprocessor (560);a computer memory (510) (the memory stores responses being sound effects which are responses to the user interacting with the vehicle); a software program executed on a processor (500) to control the operation of the vehicle (10); a program segment that generates interactions with the user of the vehicle (10); a program segment that controls the vehicle to operate in a plurality of states, including a first state (col. 4, lines 22-38) during which the operation of the motor (30) is independent of the input control mechanisms (220,230), and a second state (the second state

Art Unit: 3712

being the activation of sensors 100, which are not the input control mechanisms under control of the user such as discussed at col. 15, lines 57-67) during which the vehicle executes one or more pre-programmed movements that are not responsive to the input control mechanisms (220,230) (col. 15, lines 57-67); the vehicle (10) shaped as a car; a radio receiver (20) mounted in the vehicle to receive signals from a transmitter unit (200); accessories can be plugged into the device to provide responses to interactions (col. 3, lines 37-40).

Claims 1, 8-10, and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Gerold et al.

Gerold et al. disclose a toy vehicle (10) comprising a vehicle chassis or frame (41) having a plurality of wheels (36,38); a motor (52) driving at least one wheel (38) of the vehicle; input control means (119,132,141,144) to enable a player to control the motor (52) and/or interact with the vehicle (10), and additional means (156) to control the operation of the motor (52) independent of

Art Unit: 3712

the input control means (119,132,141,144) (col. 9, lines 24-48); a microprocessor (146); a software program executed on a processor (146) to control the operation of the vehicle (10) (col. 9, lines 24-48); a program segment that generates interactions with the user of the vehicle (col. 5, lines 33-37; col. 8, lines 8-15); a program segment that controls the vehicle to operate in a plurality of states, including a first state during which the operation of the motor (52) is independent of the input control mechanisms (col. 6, lines 65-67), and a second state during which the vehicle executes one or more pre-programmed movements that are not responsive to the input control mechanisms (col. 9, lines 24-48); a mechanism (48) to steer the vehicle (10); the vehicle is shaped as a truck (col. 3, line 2).

### Allowable Subject Matter

Claims 7, 12, and 17-21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim 16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Urszula M. Cegielnik whose telephone number is 703-306-5806. The examiner can normally be reached on Monday through Friday, from 5:30AM - 2:00PM.

Art Unit: 3712

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris H. Banks can be reached on 703-308-1745. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306 for both regular and After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Customer Service at 703-306-5648.
